RONER
CLIP 360

Precise control of
temperature and time

PROFESSIONAL FEATURES

Immersion thermostat. Combines 1200W of power, adjustable temperature (20-90°C), and cooking time up to 99 hours for precise results.

With 360° water circulation and a clip adaptable to containers up to 15L, it ensures even heating. Includes LED display, acoustic alerts, and automatic shut-off for greater safety.

Made of stainless steel with IPX7 protection, it is durable, quiet, and efficient.

Ideal for sous-vide and low-temperature cooking with professional results.
